

DJ1

DJ1 4 channel intelligent drone battery charger

DJ1 charger is dedicated designed for Phantom 2,Phantom 3,Phantom 4,Inspire,Ronin-M,Mavic drones,it has 4 independent circuit which can charge 4 different batteries simultaneously. Color touch screen shows detailed status of batteries.

Designed for Phantom 2, Phantom 3, Phantom 4, Inspire, Ronin-M, Mavic, M100, M600 drones, it can charge 4 batteries at the same time.

配图：

Charge 4 different drone batteries

Charging time:

Model	Battery pack	Time
Inspire 1	4	80 minutes
Phantom 2/3	4	60 minutes
Phantom 4	4	60 minutes
Mavic	4	40 minutes
Ronin-M	4	60 minutes
M-600	4	90 minutes

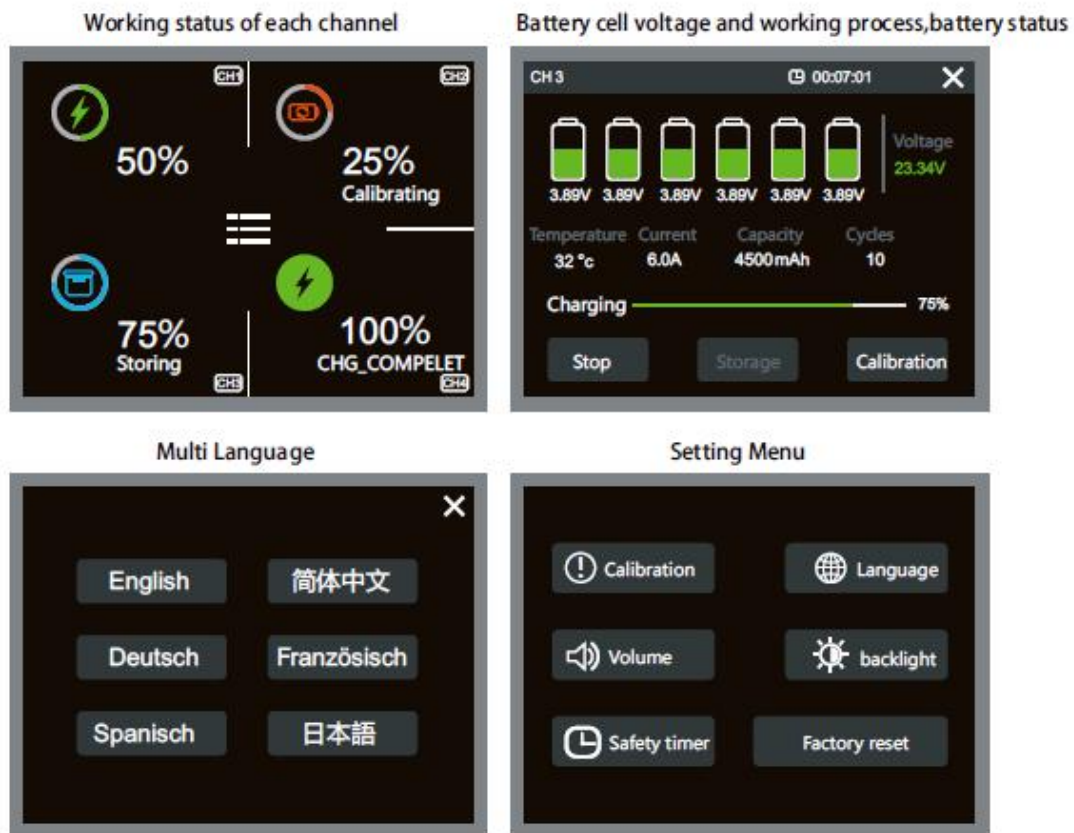

5V/2A USB Charging port, provides power for Remote controller

It is equipped with a resistive color touch screen, which displays every operating procedure and status, making operation easy and visual. It comes with pre-installed languages: English, Chinese, Japanese, German, French, Spanish.

It is equipped with a resistive color touch screen, which displays every operating procedure and status, making the operating procedures very intuitive.

3 Different mode: Charge, Storage, Calibration

Charge

It can recognize the battery type automatically and intelligent charge the battery rapidly. With its smart algorithm, it makes charger more fast, more safe, and helps to extend batteries' lifespan.

Storage

Storage mode is suggested when battery is long time not been used. It will charge or discharge the battery to a safe voltage. If battery voltage lower than the safe value, charger will charge the battery automatically, or discharge the battery if voltage higher than the safe value.

Calibration

This function is suggested when battery capacity is unnormal. It will make the BMS re-get the correct data of battery cell, then correction battery capacity and performance to extend the batteries' lifespan.

What's in the Box

Specifications:

AC input voltage:100-240V

DC input voltage:11-32V

Charge channel:4 channels

Charge power:500W max.

Charge current:8.0Ax4

Storage current:2.0Ax4

USB charging:5V/2A

Dimensions:200x96x115mm

Weight:1336g
